5	Patient profile page Note: Same for pharmacy module	System should show an error while user trying to add invalid patient name	1. Load application 2. Go to dashboard 3. Click on "Profile" option 4. Click on patient name option 5. Enter invalid digits like alphanumeric characters and numbers	System should show an error while user trying to add invalid characters	Currently, system accepts invalid digits	https://drive.google.com/open?id=1-ByH7-S6FWFXKyeMIQkolHhQuinCW1x	Low
6	Patient profile page Note: Same for pharmacy module	User should not able to enter patient name greater than max length	1. Load application 2. Go to dashboard 3. Click on "Profile" option 4. Click on patient name option 5. Enter so many characters for patient name	User should not able to enter patient name greater than max length	Currently, User can enter so many characters	https://drive.google.com/open?id=1-ByH7-S6FWFXKyeMIQkolHhQuinCW1x	Low
7	Patient profile page	User should return to their dashboard	1. Load application 2. Go to dashboard 3. Click on "Profile" option 4. Click on back arrow (available top left corner of the slide)	User should return to their dashboard	Currently, Application is closed while user clicking on back arrow from profile page	https://drive.google.com/open?id=1-FLp9SIT4zu74Aj2L03AE11sa3O-HXSM	Low
8	Patient profile page	System should not be flickered while user trying to save dependent information	1. Load application 2. Go to dashboard 3. Click on "Profile" option 4. Click on arrow available nearer to dependent name 5. System redirects to dependent details 6. Click on save button without update any information of dependent	System should not be flickered while user trying to save dependent information	Minor flickering issue is shown while user trying to save dependent information	https://drive.google.com/open?id=1-Lix7x2DgaYkIU56YD_etPLYez1Ua2	Medium
9	Patient dependents page Note: Same for Pharmacy module	">" should not be available in front of dependent name (Dependent list)	1. Load application 2. Go to dashboard 3. Click on "Profile" option 4. Click on Dependent list option 5. Click on ">" nearer to dependent name	">" should not be available in front of dependent name	Currently it is available.	https://drive.google.com/open?id=1-NK57ptRcn1y1O6EZhcMxUjzRikLqESR	Low
10	Add dependent slide (patient) Note: Same for Pharmacy module	System should show an error while user trying to add invalid dependent name	1. Load application 2. Go to dashboard 3. Click on "Profile" option 4. Click on add dependent option 5. Enter invalid dependent name like alphanumeric characters and numbers from Add dependent slide	System should show an error while user trying to add invalid dependent name	Currently, System allows invalid characters	https://drive.google.com/open?id=1sittmQfISPHjgMyZVvK0emjxdFr6HZz	Low
11	Add dependent slide (patient)	User should not able to enter dependent name greater than max length	1. Load application 2. Go to dashboard 3. Click on "Profile" option 4. Click on add dependent option 5. Enter dependent name like so many digits (alphanumeric characters and numbers)	User should not able to enter dependent name greater than max length	Currently, User can enter so many characters	https://drive.google.com/open?id=1sittmQfISPHjgMyZVvK0emjxdFr6HZz	Low

12	Add dependent slide (patient)	User should not able to enter age greater than max length	1. Load application 2. Go to dashboard 3. Click on "Profile" option 4. Click on add dependent option 5. Enter dependent name 6. Enter age like 2000	User should not able to enter age greater than max length	Currently, User can enter age 2000 from add dependent screen	https://drive.google.com/open?id=1LfnCLPpwGFD697f3jBpxx0o0Uq-C6YQ	Low
13	Explore fature of Dashboard	Back button and header of the page both are overlapped	1. Load application 2. Go to dashboard 3. Click on "Explore" link from last slide 4. Verify Header text and back arrow	Back button and header of the page should not be overlapped	Back button and header of the page both are overlapped	https://drive.google.com/open?id=1yclq4ExwQYGr3jGpcsns8bqHuW6-d51E	Low
14	Share token	System should show an error while user trying to add invalid name	1. Load application 2. Go to dashboard 3. Click on "My token number" 4. Go to tokens slide 5. Click on share with friend button 6. Enter token 7. Click on share button 8. Enter invalid name like numbers and alphanumeric	System should show an error while user trying to add invalid name	Currently, System allows invalid characters	https://drive.google.com/open?id=1U7gtJgtobIKQR5z82FLYcic1tx1NWS5d	Low
15	Share token	User should not able to enter name greater than max length	1. Load application 2. Go to dashboard 3. Click on "My token number" 4. Go to tokens slide 5. Click on share with friend button 6. Enter token 7. Click on share button 8. Enter name like so many digits (alphanumeric characters and numbers)	User should not able to enter name greater than max length	Currently, User can enter so many characters	https://drive.google.com/open?id=1U7gtJgtobIKQR5z82FLYcic1tx1NWS5d	Low
16	Share token	Should allow country code when user import contacts	1. Load application 2. Go to dashboard 3. Click on "My token number" 4. Go to tokens slide 5. Click on share with friend button 6. Enter token 7. Click on share button 8. Click on Import contact option 9. Select name which saved with country code like +91 9512344142	Should allow country code when user import contacts	Currently, some digits are disapprederd when user import contact with country code	https://drive.google.com/open?id=1S1sg4iMWP4bqm3kpV2Xj1h7if54_491L	low
17	Share token	Number of My token should be deducted once user share token with their friends	1. Load application 2. Go to dashboard 3. Click on "My token number" 4. Go to tokens slide 5. Click on share with friend button 6. Enter token 7. Click on share button 8. Enter name 9. Enter mobile number 10. Click on share button 11. Verify token amount once it's shared with your friend	Number of token should be deducted once user share token with their friends	Currently, It remains as it is.	https://drive.google.com/open?id=1-QTYHNL68wM6ZTFEECAPJNGKyfaOwza4	Critical
18	Share token	Pi Chart should be updated when user shared token	1. Load application 2. Go to dashboard 3. Click on "My token number" 4. Go to tokens slide 5. Click on share with friend button 6. Enter token 7. Click on share button 8. Enter name 9. Enter mobile number 11. Verify Pi chart once user shared token	Pi Chart should be updated when user shared token	Currently, It remains as it is.	https://drive.google.com/open?id=1-QTYHNL68wM6ZTFEECAPJNGKyfaOwza4	High
19	Add token (Patient) Suggestion	User should not able to enter (manully) tokens greater than max length	1. Load application 2. Go to dashboard 3. Click on "Add Tokens" button 4. From Add Tokens" slide enter "123456" amount for "Your number of tokens"	"Your number of token" field should accept maximun 4 digits	Currently, User can enter so many numbers	https://drive.google.com/open?id=1uxTn18CBtiqLCS-PwH54WbYz751BM-xfE	Medium

20	Payment failed	User should get message "Payment failed" when their payment is failed	1. Load application 2. Go to dashboard 3. Click on "Add Tokens" button 4. From Add Tokens slide enter '200' amount for "Your number of tokens" 5. Click on "Continue payment" option 6. Add Credit card details like Card Number: 5123456789012346 Expiry Date : 05/21 CVV : 123 7. Click on Paynow button	User should get message "Payment failed" when their payment is failed	Cutternly, Payment is failed but user is not getting "Payment failed" message	https://drive.google.com/open?id=1-Y14ds6kmxuzflok6P4SVkJsWdWW0j	High
21	Share token	Share token functionality is not working System displays following message "Share token should be less or equal to my token"	1. Load application 2. Go to dashboard 3. Click on "My token number" 4. Go to tokens slide 5. Click on share with friend button 6. Enter token 7. Click on share button	System should not show an error. Note: It's because of system cosiders only previous token. Recently, added token are not <u>considered</u> . My previously added token was 1 and recently I add 370 tokens but when i am trying to share tokens with my friend (Sharing popup screen is showing "You have 1 available tokens") It should be updated Runtime The text "You have health tokens to make Two medical queries" should be "You have health tokens to make Three medical queries" Note It's because when i manually add "371" token directly from add token it shows following Number of token 371 Price 371 Number of calls 3 but on Share token slide it shows " You have health tokens to make Two medical queries " It should be updated based on My token	Share token functionality is not working System displays following message "Share token should be less or equal to My token"	1. https://drive.google.com/open?id=1-YVkpncA034yRveDAYxnh1lB2n1aiQXi 2. https://drive.google.com/open?id=1Aawah4kncyoyzMZIFdxGdFwM2aMudbFg	High
22	Share token	The text "You have health tokens to make Two medical queries" should be "You have health tokens to make Three medical queries"	1. Load application 2. Go to dashboard 3. Click on "My token number" My current available token is 371" 4. Go to tokens slide 5. Verify the text "You have health tokens to make Two medical queries"	It should be updated based on My token	Currently It shows "You have health tokens to make Two medical queries"	https://drive.google.com/open?id=1_84832gvcjs29HfmO6pkM4qlfug4zOIX	low
23	Share token	User should not able to enter "Quantity tokens for sharing" greater than max length	"1. Load application 2. Go to dashboard 3. Click on "My token number" 4. Go to tokens slide 5. Click on share with friend button 6. Enter token so many number.....	User should not able to enter "Quantity tokens for sharing" greater than max length	Currently, It accept so many numbers.	https://drive.google.com/open?id=1Q-TSRU9VXZZusF-y0rWFh-0xy3yXugW	low
24	Share token	Applction is crashed while entering tokens for sharing	"1. Load application 2. Go to dashboard 3. Click on "My token number" 4. Go to tokens slide 5. Click on share with friend button 6. Enter token so many number..... 7. Click on "Share" button	It should not accept tokens greater than My tokens Note: Shared token<= My token Shared token should be less than or equal to My token	Applction is crashed while entering tokens for sharing	https://drive.google.com/open?id=1-_uKioVjdwaELxap2iZi2RhLRWl0eeW	Medium
25	Share token	Token should not be shared when only 7 digits mobile number is available	"1. Load application 2. Go to dashboard 3. Click on "My token number" 4. Go to tokens slide 5. Click on share with friend button 6. Enter quantity of tokens 7. Click on share button 8. Chose contact having mobile number with country code i.e. +91 878 092 2022 9. Click on Share button	Token should not be shared when only 7 digits mobile number is available	Currently, System is showing "Token hs been shared sucessfully!"	1. https://drive.google.com/file/d/10jwJCICv_p7sh89MUI7WJCsB1M5bHqEo/view 2. https://drive.google.com/file/d/10fPwVP_dQCbnT2yFxEt4ko0lg1F5P0U/view	High
26	Share token	"Invite friend" History is not updated	1. Load application 2. Go to dashboard 3. Click on ""Invite friend"" option 4. Select the options you want to invite your friend i.e. whatsapp 5. Send message to your friend 7. Verify Invite friend histtory available on share token slide	"Invite friend" History should be updated. Once user invite their friend	"Invite friend" History is not updates	https://drive.google.com/file/d/10uPNhAPB0fUpGCB60J1xlxPPy2K3JFO6/view	Medium

		<p>What should be the maximum size of an image? Suppose if system accept max size of an image is 5mb.</p> <p>Scenario: User should get an message while their are trying to upload an image grater than 5 mb</p> <p>Benifites:</p> <ul style="list-style-type: none">1.Less chances of application crashed2.Save Backend storage3.Improve application performance					
27	Photo upload functionality	Suggestion
